8th European NESY Winter-School & Symposium on Neutrons and Synchrotron Radiation

including topical highlight lectures on
Nanostructured Materials for Applications in Electronics, Magnetics and Spintronics

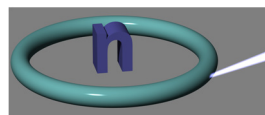

Planneralm (Austria), March 10–16, 2013

The school & symposium will cover introductory tutorials in the morning, contributed scientific talks in the late afternoon, topical highlight lectures in the evening, and a continuous poster session. Graduate students and young scientists just starting to work in this field are particularly encouraged to register and to submit an abstract.

The school venue, the Planneralm in Upper Styria, is one of the most original winter resorts in the Austrian Alps, with excellent possibilities for downhill or cross-country skiing, snow-boarding, alpine ski-touring, or just enjoying the snowy winter.

Attendance is limited to 60 students.

Registration is now open.
