Centenary Symposium 2012: Discovery of Cosmic Rays
University of Denver, Denver, CO
June 26-28, 2012

“This results... appear most likely explainable by the assumption that a radiation of very high penetration power enters our atmosphere from above.”

Viktor Franz Hess

This meeting will be at once a historical review of the developments during the 100 years since the discovery of cosmic rays by Victor Hess, a consolidation and summary of the current new data and understanding, and a look into the future of the field of cosmic ray research.

Go to http://portfolio.du.edu/CR2012 for meeting information, registration forms, hotel information and tours. Early registration is rewarded with decreased fees. Attendance by graduate students is subsidized by the National Science Foundation.
